Private equity (PE) collateralized fund obligations (CFOs) rated by Fitch Ratings have recovered from the coronavirus pandemic-driven economic downturn and market volatility, with cash flows and loan-to-value (LTV) measures having generally returned to pre-pandemic levels or better. This performance has been driven by significantly improved market conditions and the transactions’ structural features, such as de-leveraging mechanisms. Transaction-specific charts and tables on pages 4 and 5 provide additional details.

PE CFOs’ stronger positioning relative to prior periods contributed to positive rating actions as of Fitch’s recent sector review. Fitch upgraded three tranches of three transactions, changed its Rating Outlook on three tranches of two additional transactions to Stable from Negative, placed one tranche on Rating Outlook Positive and affirmed the remaining tranches at their current ratings.

After a pause of over one year driven by regulatory uncertainty and market volatility, the issuance of PE CFOs resumed in October 2020 with the MCA Fund III transaction and continued in March 2021 with the Astrea VI transaction.

Recovery Drives Increased Distributions

Distributions from underlying PE funds (defined herein as including all private market strategies, such as buyout, growth, credit and others) increased modestly in 3Q20, and more significantly in 4Q20, driven by a broad market recovery. Portfolio ages and sector exposures were the primary drivers for varying levels of distributions across PE CFOs, as illustrated in the lower chart at left.

As demonstrated in the chart on page 2, the IT and healthcare sectors drove buyout fund exits during the downturn, and this trend continues. Sectors more heavily impacted by the downturn, such as energy, also saw increased exit activity more recently. Fitch expects a further increase in energy sector exit values in 2Q21, driven by heightened activity. One example is the \$6.4 billion sale of DoublePoint Energy, providing an exit to Apollo and Quantum Energy funds. This deal alone is almost triple the total \$2.2 billion exit value seen in the energy sector in 1Q21, according to Preqin.

Spike in Capital Calls Abates

Capital calls on PE CFOs in the months after the onset of market volatility in 2020 primarily reflected defensive actions by fund general partners (GPs) attempting to support their portfolio companies or build liquidity and, in some cases, make opportunistic add-on acquisitions.

In more recent periods, capital calls on PE CFOs have decreased back to pre-pandemic levels, with existing portfolio companies needing less support from PE funds owing to market stabilization. Assuming normal market conditions, PE CFOs’ capital calls are expected to decline over time as underlying funds mature and investment periods expire. As shown in the table on page 5, Fitch-rated PE CFOs own relatively seasoned funds, averaging five years to 11 years in age, with mostly limited remaining unfunded commitments.

Global Buyout Exits By Sector: Recovery in 1H21 Continues After Uptick in 2H20

LTVs Benefit from Distributions, Valuations

Since the beginning of the economic recovery in 2H20, Fitch-rated PE CFOs have been in line with their LTV targets, supported by recovering distributions and valuations. During the height of the downturn in mid-2020, some PE CFOs' LTVs rose above their target levels before being cured, either during the same or subsequent period. The chart on page 3 shows relative LTVs for rated tranches.

Valuations^a recovered in 2H20 across Fitch-rated transactions, driven by exposure to strong performing sectors and more modest appreciation in credit and energy funds. The Astrea transactions appreciated 7%–13% for the three-month period ended in October 2020 and 8%–12% for the three-month period ended in January 2021, while the MCA transaction appreciated 6% for the February 2021 distribution period. Nassau appreciated 5% and 8% during the November 2020 and February 2021 quarterly reporting periods, respectively, while SWC's valuations appreciated 4% and 5% for the same respective distribution periods.

During the downturn in 2020, equity distributions from some PE CFOs were redirected to de-lever senior notes. Since then, all transactions have resumed paying their equity holders excess

distributions with the exception of SWC, which reinvested excess cash into additional funds.

The Astrea and MCA transactions are de-leveraging as scheduled, while Nassau is not required to pay down notes except to maintain its LTV targets. SWC's reinvestment period has ended and, beginning with the November 2020 period, SWC entered mandatory amortization, based on a percentage of available cash.

Liquidity Remains Sufficient

Liquidity remains adequate for Fitch-rated PE CFOs, as distributions and cash on hand have been sufficient to cover capital calls, interest and expenses without drawing on contingent liquidity facilities, as shown in the table on page 4. Distributions have significantly outpaced capital calls, while overall one-year liquidity coverage ratios (defined below) have ranged from 2.6x to 11.0x.

In addition to liquidity provided by distributions, Fitch-rated PE CFOs have other contingent liquidity sources that can provide further support. Contingent liquidity available varies across the transactions and includes reserve accounts, the ability to call on the sponsor to cover capital calls and bank-provided liquidity facilities.

^aValuation figures cited are based on reported NAVs in quarterly or semiannual trustee reports for each transaction. For the Astrea transactions, Fitch used fund-level data for the quarters not reported in the semiannual report. These figures are based on the latest valuations reported by underlying funds, which may not be for the same date across all transactions, and which are then adjusted for calls and distributions.

Fitch-Rated PE CFO Cumulative LTV Comparison, Net of Reserves, by Tranche Rating

Note: Data as of January 2021 for Astrea III; December 2020 for Astrea IV and Astrea V; February 2021 for SWC, Nassau and MCA; and March 2021 for Astrea VI.
Source: Fitch Ratings.

Stabilizing Outlooks, Positive Rating Actions

PE CFOs’ stronger positioning relative to prior periods contributed to positive rating actions at the time of Fitch’s sector review in February 2021. Most of the Astrea transactions’ notes were affirmed; exceptions are the Astrea III class B notes, Astrea IV class A-2 bonds and Astrea V class A-1 bonds, which were upgraded to ‘A+sf’, driven by strong underlying portfolio performance leading to strong liquidity and continued de-leveraging. Additionally, the Astrea V class A-2 bonds were placed on Rating Outlook Positive. (Fitch Upgrades Astrea III’s Class B to ‘A+sf’; Affirms Class A-2 at ‘A+sf’; Outlook Stable); (Fitch Upgrades Astrea IV’s Class A-2 to ‘A+sf’; Affirms Class A-1 and B; Outlook Stable); (Fitch Upgrades Astrea V’s A-1 Bonds; Affirms A-2 and B Bonds; Assigns Positive Outlook to A-2 Bonds); (Fitch Assigns Final Ratings to Astrea VI Pte. Ltd.; Publishes New Issue Report)

SWC’s class A notes and Nassau’s class A and B notes were affirmed with their Rating Outlooks revised to Stable from Negative, reflecting the transactions’ performance through the pandemic and sufficient cushion for the transactions before breaching Fitch’s modeling scenarios or LTV limits. (Fitch Affirms SWC Funding LLC Class A Notes’ ‘BBBsf’; Outlook Stable For All Ratings); (Fitch Affirms Nassau 2019 CFO LLC; Revises Outlook to Stable)

MCA’s class A, B and C notes were affirmed at their rating levels. (Fitch Affirms MCA Fund III Holding, LLC)

The ratings on PE CFO notes may be upgraded in the future if LTVs decrease further. If cash flows materialize at lower than expected levels or there is a material decline in NAV indicating insufficient forthcoming cash distributions, the ratings may be downgraded or placed on Rating Outlook Negative or Rating Watch Negative.

Liquidity Profiles of Fitch-Rated PE CFOs

Transaction	Liquidity Sources			Liquidity Uses			Liquidity Ratios		
	One-Year Distributions ^a	Contingent Liquidity Available ^b	Total Liquidity (One Year)	One-Year Capital Calls	Fees and Expenses	Note Interest	Total Liquidity Needs (One Year)	Portfolio Liquidity (Distributions to Capital Calls) (x)	PE CFO Liquidity (One-Year Liquidity Sources to Uses) (x)
Astrea III	213	141	354	16	3	13	32	13.3	11.0
Astrea IV	212	204	416	21	4	27	52	10.2	8.0
Astrea V	305	195	500	65	7	27	99	4.7	5.1
Astrea VI	237	208	445	56	8	22	86	4.2	5.2
SWC	46	50	96	26	1	10	37	1.8	2.6
Nassau	108	30	138	18	3	12 ^c	33	5.9	4.2
MCA Fund III	86	0 ^d	86	0 ^d	3	16 ^e	19	1.3	4.6

^aThe one-year period in the analysis above covers December 2019 to December 2020 for Astrea III; December 2019 to November 2020 for Astrea IV and Astrea V; and February 2020 to January 2021 for SWC, Nassau and MCA Fund III. The figures for Astrea VI do not represent the first distribution for the transaction; the cash flows are estimates based on the portfolios’ historical cash flows, and transaction expenses are estimated based on transaction documents. ^bNassau, SWC, Astrea IV and Astrea V contingent liquidity consists of liquidity facilities to cover interest, expenses and capital calls. Astrea III’s contingent liquidity consists of a liquidity facility to cover interest and expenses and a fully funded reserve account to cover outstanding unfunded commitments. Liquidity facility availability is as of the end of the period analyzed. SWC also has the ability to request that the sponsor meet capital calls, and Nassau can address insufficient internal liquidity generation by causing one of the PE CFO’s equity owners (which is also an affiliate of the manager) to contribute additional capital in return for preferred shares. Cash on hand is not included in the figures above for any transaction. ^cInterest for Nassau’s class B notes is deferrable. ^dThe sponsor will fund all capital calls in MCA Fund III. For the one-year period ended in February 2021, capital calls for the portfolio were \$66 million. ^eInterest for MCA Fund III’s class A, B and C notes is deferrable. Source: Fitch Ratings.

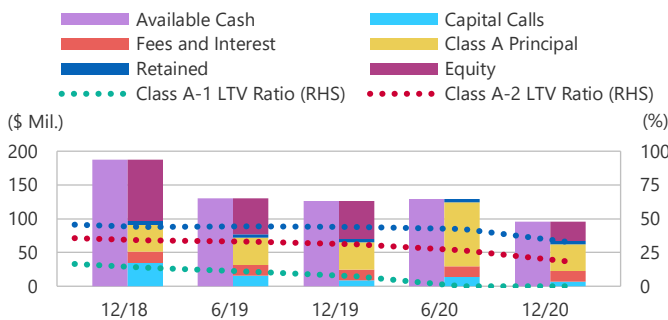

Astrea III Transaction Waterfall

Note: The first period's distributions are higher than they would normally be due to excess cash left in the vehicle from issuance proceeds and fund cash flows prior to closing. LTV ratios are net of cash in the reserve accounts. Available cash includes fund distributions, interest income and draws on cash accounts.

Source: Fitch Ratings, Azalea.

Astrea IV Transaction Waterfall

Note: The first period's distributions are higher than they would normally be due to excess cash left in the vehicle from issuance proceeds and fund cash flows prior to closing. LTV ratios are net of cash in the reserve accounts. Available cash includes fund distributions, interest income and draws on cash accounts.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
